Meet the new industrial revolution

The world's most dynamic humanoid robot, Atlas is transforming enterprise applications. Built on decades of research and real-world experience, Boston Dynamics is delivering the new face of industrial automation.

Stop restructuring your workspace for your robots and start enabling flexible, predictable, and smart material handling with Atlas.

0:04

Deploy Seamlessly

Atlas requires minimal supervision for a range of material handling applications and supports barcode scanning and other workflow integrations.

Work Intelligently

Built with the latest advancements in AI, when one Atlas learns a new skill, that task can easily be deployed across your entire Atlas fleet.

Operate Co

Atlas autonomously navigates and swaps out its own batteries back on

Enterprise Intelligence

Orbit is your single source of truth: your tool to connect Atlas to MES, WMS, and other systems of record; to oversee Atlas' work and performance; and to review fleet metrics.

Today, customers are supercharging their AI and enterprise data strategy with their existing Orbit platform.

Your Journey to Atlas

From first steps to skilled fleets: Our goal is for every customer to see real value with Atlas, delivering feature-rich, autonomous material handling solutions. Atlas has already made impressive strides, backed by rigorous field testing, industry-leading AI, and years of experience deploying mobile robots into customer operations. Now we want to [hear how Atlas can help you!](#) Our team will be in touch with qualified prospects to discuss how dynamic mobile robots can revolutionize your operations.
